

Sales Performance & Analytics Dashboard

Executive Overview & Sales Trends

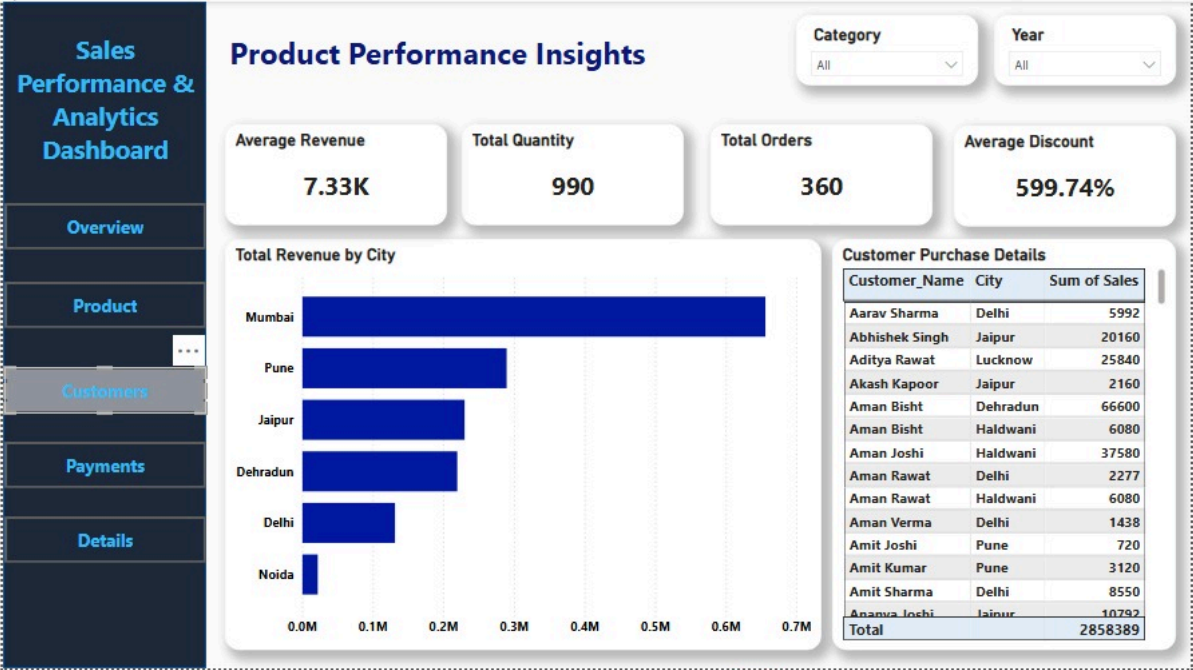

- **Sales Flow:** The Area Chart displays daily sales movement, tracking high initial peaks that eventually stabilize into a consistent transaction trend.
- **Revenue Leader:** Electronics heavily dominates the store's revenue contribution at 55.06%, with Furniture holding 38.96%.
- **Core Metrics:** Key KPI cards instantly track the updated 7.33K Average Revenue, 990 Total Quantity, and 360 Total Orders.

Product Performance & Category Analytics

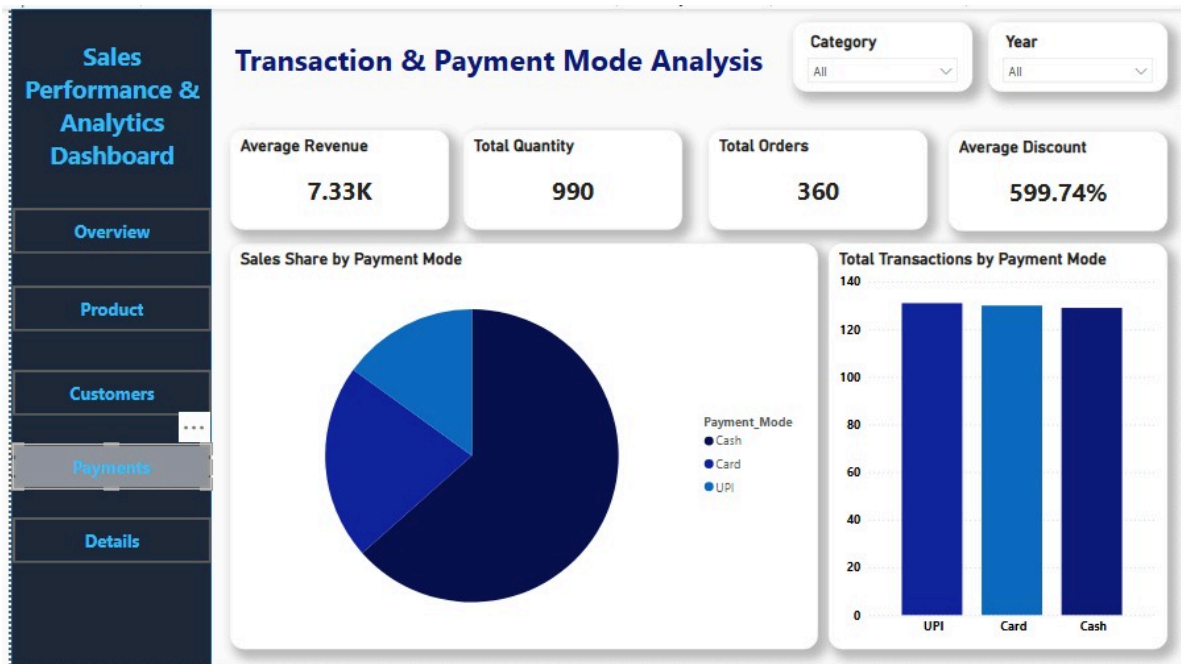

- **Top Individual Item:** Laptop stands out clear as the number one revenue-generating product across the inventory.
- **Volume Distribution:** Office Supplies drives the maximum transactional bar volume, followed closely by Electronics and Furniture.
- **Inventory Focus:** Items like Sofa, Tablet, and Dining Table follow Laptops in the top product rankings, helping optimize stock levels.

Customer Page Insights

- **Top Billing City:** Mumbai stands at the absolute top of the bar chart, generating the maximum sales revenue for the store.
- **Regional Spread:** Pune, Jaipur, and Dehradun follow as the next major high-performing geographic hubs.
- **Customer Mapping:** The detailed ledger accurately tracks customer names like Aarav Sharma and Abhishek Singh with their specific locations and exact sales value.

Transaction & Payment Mode Analysis

- **Preferred Mode:** UPI holds the largest visual share in the sales donut/pie split, showing high consumer adoption for digital payments.
- **Transaction Volumes:** Clustered column charts verify that UPI, Card, and Cash modes maintain high bar heights across total orders.
- **Payment Behavior:** High-ticket items lean heavily toward UPI and Cards, while Cash is utilized for smaller, frequent ticket orders.
